

AMENDMENTS TO THE CLAIMS

1. (Cancelled)

2. (Cancelled)

3. (Currently Amended) A method for providing and collecting information associated with a collection of occupational information including a collection of occupational titles and data measures for each of the occupational titles in the collection, the method comprising:

providing a publicly available web site for users of occupational information, wherein the publicly available web site allows the users of occupational information to access information associated with the collection of occupational information and to contribute information used to update the collection of occupational information;

providing access to information recently contributed via the publicly available web site, wherein the recently contributed information includes information contributed using questionnaire forms ~~provided on~~accessible from the publicly available web site, ~~wherein the questionnaire forms are configured for completion by the users of occupational information, and wherein user input associated with the completed questionnaire forms is used to update the collection of occupational information; and~~

updating the collection of occupational information based on receiving a submission of ~~an at least partially completed~~a questionnaire form accessed from the publicly available web site and at least partially completed, wherein the questionnaire form does not specify a current or anticipated job opening, and wherein the updating includes either (a) adding a new occupational title and

associated non-economic data measure information to the collection of occupational information or (b) modifying non-economic data measure information associated with an occupational title that already exists in the collection of occupational information.

4-9. (Cancelled)

10. (Currently Amended) In a computer system, a method for maintaining a collection of occupational information including descriptions of specific occupations, the method comprising:

providing end users with access to the collection of occupational information, including providing access to a questionnaire for receiving input from a user of the collection, wherein the questionnaire is for association with a specified occupation for which information is maintained in the collection of occupational information, wherein the questionnaire is a structured analysis questionnaire configured to obtain non-economic worker measure information for the specified occupation, and wherein the questionnaire is not configured for specifying job opening information;

receiving the questionnaire from the end user;
analyzing the information in the received questionnaire;
providing the user with results of the analysis of the questionnaire; and
updating the collection of occupational information to include information extracted from the questionnaire.

11. (Original) The method of claim 10 wherein the questionnaire is a job analysis questionnaire.

12. (Currently Amended) The method of claim 10 wherein the questionnaire is a job analysis questionnaire and wherein the questionnaire is pregraded to provide default answers for the specified occupation.

13-29. (Cancelled)

30. (New) The method of claim 3 wherein the modified data measure information includes skill collection information for the associated occupational title.

31. (New) The method of claim 3 wherein the modified data measure information includes industry definition information for the associated occupational title.

32. (New) The method of claim 3 wherein the modified data measure information includes stress related work measure information for the associated occupational title.

33. (New) The method of claim 10 wherein the updating includes performing statistical analysis relating to the worker measure information associated with the specified occupation.

34. (New) The method of claim 10 wherein the questionnaire is a direct analysis questionnaire configured so that raw data from the form is in a format that facilitates direct submission to a raw data database associated with the computer system.

35. (New) The method of claim 10 wherein the questionnaire is a job analysis questionnaire that models publicly available work desk papers used by disability determination adjudicators.
